

CITY OF SYDNEY · AUSTRALIAN INSTITUTE OF
MANAGEMENT · LIVE 1-HOUR SESSION

Simplify Your Admin Live Working Session

One hour, hands-on. We build real admin tasks together — then turn them into repeatable workflows you can use from Monday.

of our local area.**

BEFORE WE START

You spoke. We listened.

Your feedback from the workshop shaped this hour. Three things you asked for:

1

More business, less “intro to AI”

Real admin jobs — not personal examples

2

Build it live — show me how

Watch tasks and automations actually get set up

3

Meet me at my level

Clear lanes for new and confident users — nobody left behind or held back

THE HOUR

Four blocks, sixty minutes

1

Foundations, fast

The one prompt formula that fixes most outputs

0:00 - 0:10

2

Build it live

Three real admin jobs, done in front of you

0:10 - 0:32

3

Chat → Workflow → Agent

Make it repeatable — and watch Cowork run one

0:32 - 0:50

4

Your 7-day plan + take-home kit

Improve one thing this week — with everything to do it

0:50 - 1:00

QUICK POLL • 20 SECONDS

Where are you with AI right now?

A • New to it

Tried it once or twice, not sure where to start

B • Dabbling

Use it now and then for the odd task

C • Daily

It's already part of how I work

No wrong answer. This is how I'll pitch the next 50 minutes — and which lane to follow.

PART 1 • FOUNDATIONS

What AI is great at — and what it isn't

LEAN ON IT FOR

- First drafts & rewrites
- Summarising long documents
- Turning mess into structure
- Options, angles and ideas
- Reformatting and tidying

KEEP THE HUMAN ON

- Guaranteed accuracy
- Confidential judgement calls
- Legal & financial certainty
- Tone with real people
- Accountability for the result

PART 1 • FOUNDATIONS

The one formula behind every good prompt

Act • Explain • Please

- **Act** as the useful expert — the role you want answering
- **Explain** the context: the business, the situation, the constraints
- **Please** do the specific task — and say what the output should look like

NEW

Weak result? Add a role, more context, the goal, the tone, the format. One of those five is almost always missing.

CONFIDENT

Save your best prompts as reusable templates with blanks — your own swipe file beats writing from scratch every time.

PART 2 • BUILD IT LIVE

Four real admin jobs — the stuff that runs your day

No theory. We'll build the best three together — pick the ones closest to your business. The fourth is in your take-home kit.

A • Enquiry → booking

A customer message → a clear reply, the right questions, and next steps

B • Reviews → actions

Customer feedback → key themes and a few practical improvements

C • Quote & invoice

A client request → an itemised quote, a matching invoice and a send-ready email

D • Weekly roster

Availability + hours → a roster with gaps flagged and shift messages drafted

EVERYONE FOLLOWS

CONFIDENT: BRAND VOICE

BUILD A • ENQUIRY → RESPONSE + BOOKING

Turn a customer message into a booking

Act as the owner of my [café / salon / studio / trade]. **Explain:** here's an enquiry from a customer asking about availability and pricing. Our tone is warm and helpful. **Please** draft a reply that answers what we can, asks the follow-up questions we need to lock in a booking, and suggests clear next steps.

[paste the enquiry]

CONFIDENT

Paste a saved **brand-voice block** at the top so every reply sounds like you — then reuse it for every enquiry.

EVERYONE FOLLOWS

SAFETY

BUILD B • FEEDBACK & REVIEWS → INSIGHTS

Turn reviews into things you can act on

Act as a customer-experience analyst. **Explain:** below are recent reviews and feedback for my business. **Please** group them into key themes — what people love and what frustrates them — and suggest three practical, low-cost improvements I could make this month.

[paste your reviews]

SAFETY

Before you paste: strip customer names and personal details — keep the feedback, lose the private bits. And turn off “train on my data” in each tool’s settings.

EVERYONE FOLLOWS

CONFIDENT: SAVE THE TEMPLATE

BUILD C · QUOTE, INVOICE & SEND

From a client request to a quote, invoice & email

Act as my admin assistant. **Explain:** a client has asked for [describe the job]. My rates are [your rates]. **Please** create an itemised quote, a matching invoice with totals, and a short friendly email to send them. List any assumptions so I can check them.

ALWAYS

Check the figures yourself before anything goes out — AI can get sums wrong. It drafts; you approve.

EVERYONE FOLLOWS

CONFIDENT: REUSE WEEKLY

BUILD D • STAFF AVAILABILITY → ROSTER

Build next week's roster in minutes

Act as a duty manager. **Explain:** here are my staff, their availability, and our opening hours. **Please** build a simple weekly roster as a table, highlight any shifts I can't cover, and draft a short message I can send each person with their shifts.

[paste availability + hours]

NEW

Start with one real week. Fix what it gets wrong, then keep the format — next week is a 2-minute job.

PART 3 • MAKE IT REPEATABLE

From one-off chat to something that runs itself

Chat

You ask, it answers. Great for one task, one time.

**Workflow**

The same steps, saved and reused. Same prompt, new input, every week.

**Agent**

It does the multi-step job for you — you stay in the loop and approve.

Most admin pain lives in step two: things you redo constantly. That's where the time is.

THE ONE YOU ASKED TO SEE

PART 3 • COWORK, SET UP FOR REAL

An AI that works across your files — with you watching

- Point it at a **folder on your computer** — receipts, enquiries, documents
- Give it a job in plain English: *“sort these, draft a reply to each, summarise the lot”*
- It works step by step — **you approve before anything is sent or saved**
- Start tiny: one folder, one repeatable task. Not your whole business at once.

NEW

You don't need this yet — just know it exists for when a task becomes a weekly grind.

PART 4 • YOUR MOVE

Don't transform everything. Improve one thing.

Pick the one admin job that drains you most. Spend 20 minutes this week building a prompt for it. That's the whole plan.

- **Today:** choose your one task
- **This week:** build & save the prompt — use the Prompt Builder on the site
- **Next week:** reuse it 3 times — then pick the next one

EVERYONE

The 7-Day Action Plan tool walks you through this — it's in your take-home kit on the next slide.

TAKE-HOME KIT

Everything from today, in one place

- ▶ **Live-build prompts**
Every prompt we wrote, ready to copy
- ▶ **Prompt & Admin libraries**
Reusable templates for your business
- ▶ **My AI Toolkit**
Everything you build, saved in one page
- ▶ **7-Day Action Plan**
Pick one task and ship it
- ▶ **Cheat sheets & glossary**
Printable references and plain-English terms
- ▶ **These slides as a PDF**
Yours to review and share

Open the site & kit

Don't transform everything. Improve one thing.

Thank you. Take the kit, pick your one task, and
start Monday.

BEFORE YOU GO

Two minutes that shape the next one

Feedback QR
added Monday

Tell us how today went

A quick scan, two minutes. Your feedback shapes the next session — just like this one was shaped by yours.

COMING UP

AI for Marketing Bootcamp

Wednesday 23 July. Personas, brand voice, content and visuals — the marketing companion to today.

Expressions of interest are still open.
